Internet-of-Things: IoT World meets in Brazil

21-24 May, 2013

IOT INTEROP: RFID CASE

21-23 May 2013,
Campinas

At the CPqD facilities, will be held the RFID Interoperability test event, jointly organised by CPqD, ETSI and the Probe-IT project. The plugtest will focus on the RFID technology, and during these days three different scenarios will be exercised.

At the Faculty of Medicine facilities, will be held the Probe-IT Workshop. Experts and practitioners, Brazilian companies and academia will discuss issues related to Internet-of-Things. Participants will look first at current status of IoT and then foresee the future of IoT. Finally, participants will explore the mechanism in-place to move IoT forward. Last but not least, there will be a presentation by CPqD and ETSI about the Interop plugtest event.

WORKSHOP IOT: TODAY, TOMORROW AND WAY FORWARD

23 May 2013, São Paulo

At the Faculty of Medicine facilities, will be held the IoT-A Meet-Up. Experts from the IoT-A and IoT-I projects will present the state of the art in terms of IoT architectures, reference, domain, information, communication, functional models, use cases and best practices.

In addition, a panel on open source/bottom up/acker, artistic and design will be formed with European experts and researchers from the USP's iRIoT and Cidade do Conhecimento initiatives.

IOT-A MEET-UP

24 May 2013, São Paulo

During the workshops and co-located with the bi-annual meeting of ANSP, a set of Internet-of-Things demos will be performed exhibiting outstanding solutions and applications of IoT technologies. Demonstrations are to be performed by IoT practitioners from key European IoT projects and Brazilian projects/enterprises.

IOT DEMOS

22-24 May 2013,
São Paulo
